THE Chicago paper undertakes to explain it by the fact that in the smaller communities the town drunkard is a familiar character, whose tragedy interests everybody. while in the cities nobody knows nor cares what happens to anybody else. An analysis of the actual votes seems to indicate that the difference goes still deeper. It is not merely a conflict between the city and the country. In California, San Francisco is wet and Los Angeles is dry. Some of the wettest spots in

California are small towns, and its

dryest spot is its largest city. The

difference seems to be in the kinds of people; not in their numbers. THE fact is that the American democracy is dry, while the cosmopolitan plutocracy and the imported proletariat are wet. Even in the great cities, the middle-class democracy, of American birth and traditions, votes dry. But in most cities this class is overshadowed, both in influence and in numbers Where, as in Los Angeles, it constitutes most of the people, including magnates and workingmen, the great city is just as dry as if its inhabitants were scattered in many villages. In the older industrial cities, the dominant class in business and society prides itself on having acquired European habits and outlooks, while the dominant class in politics has not yet lost them. So Old America clashes with New America, on this most personal of all public problems. Only as time makes New America gradually also into Old America will there be

THIS is written in Chicago, where they have weather instead of climate. Across the street, on a snow-covered vacant lot, eight young men are practicing football stunts. Most of them, evidently never have been and never will be college students. They do not play well. They could barely qualify as substitutes on the scrub team of a second-rate college. But do they not epresent a more wholesome standard of sport than our present college customs? For they are playing football for the sake of football And they are playing it themselves, as best they can, instead of sitting in a stadium and rooting for specialists, who play it better. They do not aspire to glory for themselves, nor for any institution. They just play football.

agreement.

DOUBTLESS it would be chimerical to suggest that American college athletics become either collegiate or athletic. Instead, except for the selected star performers, it is dramatic and vocal. It is a show and a scream. And yet this ideal, even if beyond our collegian possibility, is not beyond human attainment. It is actually realized in Oxford and Cambridge. These great universities produce few if any champions who could compete with directing the coastwide probe. the best of ours. But it is their ageold tradition that every student takes personal part in some sport every day. There may even be an inter-collegiate football contest without a single spectator-not because nobody is interested in athletic contests, but because everybody else is, at the same time, engaged in some such contest himself. The result is few great athletes, but a whole university population of fair ones.

And the sun never sets on the mighty Empire of Britain, ruled by men who did not root on the bleachers, but did it themselves.

THE Senate "regulars" are has-I tening to undo their blunder of last session, when they kicked the irregulars out of the party. They need them in their business. And the irregulars are as ready to come back. They need the committee assignments, which are the rewards of party membership, plus seniority. So the party will be "united" on the only thing which holds parties together nowadays-the distribution of the jobs.

T WILL be noted that there is no understanding that the restored irregulars shall support Republican measures. They merely agree to support Republican candidates. In fact, there is nobody who could certify to them which are Republican measures, even if they did so agree. If a Republican policy is to be determined by its conformity to Republican principles, and its contrariety to Democratic ones-nobody knows what are those prin ciples, in either party. If it is to be tested by the fact that Republicans vote for it and Democrats against it-there are no such measures Every important bill which passes Congress is supported and opposed

by about half of each party. So the test, in Congress, becomes the same as it has long been outside. A Republican is one who votes for Republican candidates.

Ex-Secretary of Interior Compared with Lincoln, In Statement by Lawyer

(By United Press) VIASHINGTON, Dec. 2. - The Fall-Doheny conspiracy trial defense today began its effort to acquit the Elk Hills oil lease principals by placing the stamp of approval of the law and government experts on their transactions.

Following closing of the prose cution case against former Secretary of Interior Albert Fall and Edward L. Doheny, defense attorneys placed the records of the defendants before the youthful jury. Fall had the "beginnings of an Abraham Lincoln," Defense Attorney W. J. Lambert said in his opening statement, picturing the former cabinet member as a faith-

ful public servant. Witnesses Praise Doheny Two character witnesses, nextdoor neighbors of Doheny in Los Angeles, praised his patriotism and integrity and one said he was the 'foremost patriot" of that city. The jury in the Haines, Ring and Bloomer damage suits against the Pacific Electric Railway company and Mr. and Mrs. Otis Richards this fternoon was debating the question whether to award judgment to the plaintiffs, and how much, if any. Also whether to fix responsibility for the fatal crossing accident of May 7, 1925, upon the railway motorman, the dead driver of the wrecked automobile, or to distribute it among these two and the other

passengers of the automobile. If the motorman was held solely to blame, the jury probably would ssess damages against the Pacific Electric company, it was said. If responsibility was found to rest alone upon Glen A. Richards, Santa Ana youth, who piloted the automobile and was killed in the wreck, Mr. and Mrs. Richards might find themselves facing a damage award. If Mr. and Mrs. Frederick Bogeman the jury decided that all parties to of Oceanside, Long Island, have ar- the accident deserved part of the rived here for a visit with their blame, then damages would be daughter, Mrs. Eugene Kahen of awarded to nobody, according to

Wind Aid To Flyers

"Flying east, it isn't so bad," says Smith. "When you get a few thousand feet off the ground in this part of the country, you almost invariably find a strong wind from the west. Consequent-ly, a pilot flying east from Cleveland tries to climb above the fog or cloud banks; if he hits the wind, it's just so much gain. But coming west from New York he can't do that. If he does he has to buck the wind, and that cuts down his speed. And that, in turn, eats up his gas supply so that he's liable to run out of gas before he reaches his destination. Lawyer Objects To Reports Of Court Decision

Arthur E. Koepsel, Orange attorney, today issued a statement objecting to published reports of a superior court decision, in connection with a lawsuit filed against Koepsel by Harvey Garber. Garber having deeded certain Orange property to Koepsel, sued to have the deed set aside, alleging that it had been executed under an agreement which Koepsel had not ful-

Koepsel today denied that the court, as had been reported, held that the deed should stand, but that it was decreed that he hold the property in trust for Garber,

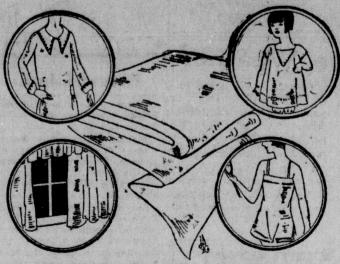

to secure an indebtedness. "The deed was held by the court to be good and there were no strings whatever placed upon it," said Koepsel. "The court took note that there was an indebtedness owing me from Garber, but the court did not say anything about this deed being held by me in trust. The court decided that, when this deed was executed to me, both parties knew what they were doing and 'no undue influence was

ONLY POSITIVE can get the ground-in dirt

-and only The New Hoover can furnish Positive Agitation, along with sweeping and suction! Positive Agitation is the revolutionary principle which marks the difference between The New Hoover and a "vacuum cleaner."

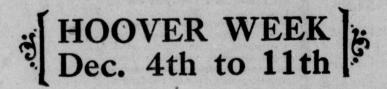

Sweeping is good. It picks up lint, and threads. Suction is good. It whisks away surface dirt and loosened lint and grit. But neither can reach down into the rug, and loosen the packed-in grit that ruins rugs by cutting away the nap. .

Positive Agitation raises the rug on a cushion of air, and flutters it, shaking and tapping out the grit, so that sweeping and suction can do their part.

That is why The New Hoover will remove more than twice as much dirt, in the ordinary cleaning time, as even former Hoovers! It is 131% more efficient.

These statements are made during this Hoover Week - a week during which we are making a strenuous effort to point out the difference between a New Hoover and an ordinary "vacuum cleaner."

May we show you, by really cleaning a rug for you? Won't you telephone us—tell us when to call? Do not feel under any obligation, for there will be none whatever. The New Hoover, complete with Dusting Tools, now only \$6.25

TOKIO, Dec. 2.-The demand made by Bruce, prime minister of the Commonwealth of Australia, that all necessary steps be taken to prevent the mandate for New Guinea passing into any other hands but those of Australia, is regarded here as having a two-fold signifi-

Australia realizes that New Guinea, although not of much use or importance in itself, is nevertheless an outpost of Australian defense. To the Land of the Southern Cross, New Guinea occupies a position in her defense scheme not unlike that which Cuba has with regard to the United States, or the position that Korea, according to the Japanese, has for Japan proper.

New Guinea Effective Defense The demand, therefore, of the

Australian prime minister, may be interpreted to mean that the defense chieftains of the Australian commonwealth, and perhaps the supreme war council of the British empire, are convinced of the importance of New Guinea for an effective defense of Australia and that, on no conditions could this territory, contiguous to the Ausfrom it by only the narrow Torres straits, ever be allowed to pass into allen hands.

HUGE task indeed...yet that is what the A Crescent Creamery Company has been doing for twenty four years.

Dairies producing milk for Crescent Creamery Company are paid on the basis of tested richness and food value of their milk to provide them an incentive to attain to higer and yet higher quality.

This is one of the reasons why you may rest assured that the bottle of Crescent Milk on your table is as good, as high in food value, and as carefully protected as human ingenuity

City, County and State inspectors scrutinize every producing dairy. Not content with this the Crescent Creamery Company maintains its own inspection service and every shipment of milk received is tested by highly trained technicians in an up to date laboratory.

Thorough pasteurization, sterile bottling machines, our own refrigerating plant . . . all of these are but integral parts of Crescent Creamery Company's effort to make man's best food better.

First 99-Year Lease In Orange County Is Recorded

IDEAS BUSH. and Ideals

Winter tourists in Southern California are setting a new record this year. The statement is based on advices from hotels, railroad offices, automobile clubs and other con cerns in touch with the traveling

Tourist travel in the Southland usually drops off noticeably about the last of August. This year there has been an increase of approximately 12 per cent since that time, the records show. The extraordinary number of non-resident automobiles cannot escape the notice of any observing person. They are here from every state in the nation, apparently.

The reason for this unusual tourist travel is rather vague. It may indicate a number of things. The speculative mind can probably find some satisfactory explanation. Regardless of causes, the satisfactory fact is that the tourists are here and the question is not so much "why are they here?" as "what are we going to do about it?"

With the development of the country in mind, as a matter of course we want these tourists to like California. We want them to stay, or to make up their minds to dence. They will make good, forthe same kind of average citizens that we are, because nearly all of us came from some place "back and Third east." A majority of these tourists will like California as a country. They wouldn't be human if they failed to admire the beauty of the land and its remarkable products. They all like our boulevards, our charming coast line and our scenery in general. But after all, its the people that make a country. The treatment the tourists receive at the hands of chance acquaintances will have an important bearing on the impression received in California.

Every tourist wants information. He should receive it accurately. Directions for traveling, carelessly or inaccurately given, invariably lead to the discomfort and exasperation of the tourist. Every established Californian should know his own about it, it is advisable to send the inquiry to some source of definite information.

Tourists expect flowers and oranges and a congenial climate in Southern California, but they also expect courtesy and friendliness from the people, and there are not sufficient attractions in any land to overcome the sting of a surly answer to a civil question.

According to reports, McCarter paid approximately \$35,000 for the 50-foot frontage on Bush street. The lot is covered with a number of one-story business rooms.

Declaring that he had made the purchase for a permanent investment, McCarter said today that he centemplated within two years the erection of a two or three-story business block on the corner. Leases, he said, would prevent improvement at an earlier date.

McCarter this week completed the exchange of his business property on the northeast corner of Sycamore and Second streets on territory well enough to direct a the basis of \$700 a front foot for stranger. Pioneer, Mrs. Warling

Real estate history in Orange ounty had a new chapter written this week, when the first 99-year lease ever recorded in the county was entered into by Roy Maggart, Los Angeles capitalist, and Mrs. Ora Warling, of Laguna Beach. The property involved is considered by real estate men to be the most important corner in Laguna Beach, the intersection of Forest avenue and Coast boulevard. The land has a frontage of 120 feet on Coast boulevard and 15 feet on Forest avenue. Mr. Maggart recently purchased the 75 feet adjoining on Forest avenue, giving him a total frontage of 210 feet. The total rental will be more than \$225,000. Plans are being made for a two-story stores and office building to cost \$100,000.

News Creates Stir Following closely the announcement of Roy W. Peacock that he would build a modern building for the Safeway Stores company on the other side of Forest avenue, in the same block, the news of the Maggart deal created a stir in real estate circles. It was made by Frank B. Bowker, of Los Angeles and Laguna Beach.

Mrs. Warling is one of the Laguna Beach pioneers. The Sandwich mill, formerly owned by Mrs. Florence F. Irons, stands on the site of the land involved in the lease. The building and lease held by Mrs. Irons were purchased by Mr. Maggart. There are other leases s property that

Helen Says, "Never Give Up!"

Whenever we think of Helen Wills, we wish that every young girl in the world could know about her. She is, perhaps, the most outstanding example of a sureenough American character. Not that she is the American champion tennis player, or that she holds a Phi Beta Kappa (scholarship) key, or that she has good taste in clothes, but it IS that she is so engagingly charming throughout it all.

Consequently when she gave out ten points for beginners in tennis, we believe they bear repetition. Tennis is a game that every girl should play for health's sake. The

Mr. Maggart intended to put up two applications for leases from Laguna Beach merchants. He then conceived the idea of the larger building and negotiations were begun for the Warling property Mrs. Warling preferred to lease the land and that is the way the deal went through.

A portion of the Warling lot was cut off when the Coast highway was routed through Laguna Beach. The land is situated on the famous fish hook turn" in the central part of the business district that caused several suits against the county by property owners who refused to deed rights-of-way free because they believed that the boulevard should have followed a straighter course.

-more than merely "delicious chocolates"

THERE must be more than merely "candy" in the box you give. Care in selection, good taste, true thoughtfulness-all must be there in a name that you know and she knows represents the utmost in a gift like this.

For twenty years Leihy has guarded quality to

The fruit and preserves used in the fashioning of these candies are put up by Leihy himself. They are combined with smooth, creamy fondants to make centers of surprising delicacy, then dipped in a satiny chocolate that assures a tempting confection.

Always a leader, Leihy's chocolates are now even better than before. For new methods, experience and increased skill have been added to improve them.

Take a box of Leihy's home tonight and see what a favorite it will prove.

They are sold in all the better stores whose customers want something more than just ordinary grades. Make a note of it-Leihy's tonight!

LOS ANGELES, Dec. 2-A movement was under way today among friends of Aimee Semple McPherson to have the conspiracy case against the evangelist thrown out

Petitions to that effect were circulated by members of Angelus temple. They were addressed to Los Angeles county authorities and asked that "the McPherson case be forgotten forever.

Decision to petition for a dismissal of the case was made at a massmeeting at Angelus temple, attended by 2000 persons.

District Attorney Asa Keyes, on learning of the action, declared the case would be prosecuted regardless, and that Mrs. McPherson would be compelled to stand trial in superior court as ordered, following a lengthy preliminary examination. Mrs. McPherson declined to comment, declaring the action was taken without her knowledge.

The evangelist denied today that W. I. Gilbert, her legal defender during the recent preliminary hearing, had been dismissed as her attorney. Gilbert will be retained to defend her during the trial, she

Persistent coughs and colds lead to serious trouble. You can stop them now with Creomulsion, an emulsified creosote that is pleasant to take. Creomulsion is a new medical discovery with two-fold action; it soothes and heals the inflamed membranes and in-

hibits germ growth.

Of all known drugs, creosote is recognized by high medical authorities as one of the greatest healing agencies for persistent coughs and colds and other forms of throat troubles. Creomulsion contains, in addition to creosote, other healing elements which soothe and heal the infected membranes and stop the irritation and inflammation, while the creosote goes on to the stomach, is absorbed into the blood, attacks the seat of the trouble and checks the growth

of the germs.

Creomulsion is guaranteed satisfactory in the treatment of persistent coughs and colds, bronchial asthma, bronchitis and other forms of respiratory diseases, and is excellent for building up the system after colds or flu. Money refunded if any cough or cold is not relieved after taking according to directions. Ask your druggist. (adv.)

for the Living Room

-What Christmas gift can possibly bring into the home a greater degree of luxury and comfort than overstuffed furniture? It is a gift from which the entire family will derive years of pleasure and contentment.

-The Chandler display of overstuffed furniture is truly wonderful-one which would be a credit to stores in cities very much larger than Santa Ana.

-It is a display that is attracting Christmas shoppers not only from all sections within the borders of Orange county, but from the outside -Chandlers feature dozens of different designs and patterns of over-

stuffed furniture, upholstered in rich tapestries, soft toned velours and durable mohairs, in shades to match any interior decorative scheme. -The wide range of styles includes everything from small chairs to

complete suites. And, if you wish, a davenport or chair may be selected now from a certain suite and added to later on. This "piece at a time" makes buying easy. -Chandlers have also an exclusive showing of genuine Karpen overstuffed furniture, famous for its beauty of design, superior workmanship.

It's a Christmas Gift For Somebody

The bargain offered in this lovely home, now being sacrificed by owner for quick sale, is a substantial gift of at least \$1600 value. Corner lot, two walnut trees, lawn, shrubs. Paving on both streets fully paid for. Don't overlook that saving. House is Spanish type, stucco, with seven large rooms, including three bedrooms and sun room. Beautifully finished interior. Artistic window drapes go with house, which is another big saving to buyer. Can make real bargain, also, on new furniture, which we will have no further use for. This property is in new northwest section, only eight blocks from courthouse. Can't be matched anywhere in town for less than \$9500. Our price is only \$7300.

Critics Believe Redshirts Have Power, Speed to Be On Long End Tomorrow

Whether Fullerton high school will be undisputed champion of the Orange County league or will have to share the football title for 1926 with Anaheim and Huntington Beach will be definitely determined tomorrow afternoon when "Shorty" Smith's Redshirts and George Hobbs' Colonists collide at Anaheim in the third and final contest of the circuit's triple tie

The game will begin at 2:30 o'clock.

Impartial observers who have witnessed most of the matches during the regular season and all of the playoff skirmishes are almost unanimous in picking Fuller-ton to win, believing that the Redshirts cleared away their most

There is much babble about "the wife who has all the modern conveniences and has not enough to do in her home to keep her Articles galore are written about labor-saving devices for the home which supplant the old-fashioned wife's elbow grease, leaving her jobless and a prey to every whim that blows.

I have often wondered, reading this blather, just how many women really did own vacuum cleaners, electric washers, percolators, toasters, electric lights, bath rooms, furnaces, window ventilators, fireless cookers, spiffy gas ranges, and all the myriad forms of "labor-saving devices," as they are quaintly known.

I have wondered, too, just how much actual "labor saving" all the implements hurled at a house-

are nice but they are used more frequently than the old-fashioned Saturday night wash tub, and they must be scoured oftener, besides meaning one more room to be kept clean and spotless.

Heretical though it may sound-I believe that the modern housewife with all her running water. electricity, gas, plumbing, and the like, has just as much to do as grandmother who toted fire wood and water. It is merely an exchanging of one set of hardships for another. Modern conveniences in the home are nice, of course, but they bring a new complexities attached our modern high standard of living. Ask any man if stoking the furnace is much simpler than

building a fire in a stove.

And the other question, of course, is just how many women do have all these home conveniences. Is not all this prattle revolving about a type of wife who is in the minority? Is not the discussion on a par with the one which asks "what will become of the home with all the women leaving it?" "All the women" meaning about one-tenth of one

Now comes support for the wisdom of this question with some discoveries by the General Federation of Women's clubs.

Only 60 per cent of our homes have stationary wash bowls, say Only 75 per cent of American

homes have kitchen sinks. Only one-third of our homes have stationary wash tubs.

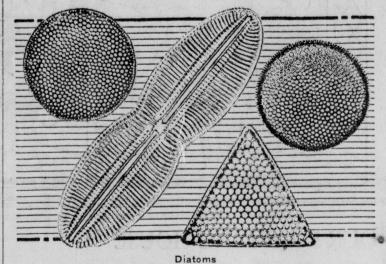

And as for electric washers, vacuum cleaners, electric ranges and the like, only a very insignificant portion of our homes have these luxuries.

There is much sputtering on the club women's part at these findings. They drag forth the old argument about a man demanding the best equipment possible for his office, but expecting his wife to do her job with improper or no tools. Well, I'm for women to the last drop of my blood, but this argument doesn't get under my skin very much. After all, if a wife is a stay-at-home wife her husband pays for the tools in both places. It's tools that are making the money to that establishment. He probably couldn't make a cent without The moire exford with rhinestone swim across the English Channel them. They come first. The trimming on the heel is sponsored and back, without stopping, next house can get along somehow, for formal evening wear by July. and I'm not so sure that a va- Julienne. cuum cleaner would make so much difference at that. If he can buy both, well and good. Of course, I, too, detest a male who won't give his wife a lift when he can.

TASTE GOOD, TOO for a frosted cake are much to be recommended. Raisins, canned pineapples, dates or oranges can always be spread over a whipped cream base to glorify a very simple sponge or loaf cake.

EVERYBODY TRAVELS NOW

By OLIVE ROBERTS BARTON

Just see what Mr. Huxley says! People travel for the same reason that they collect works of art-because the best people do it."

With all respect to Mr. Huxley, I wish to asservate that they do not. There never was born a child who did not have a love of travel and adventure in him. It develops as soon as he can use his little legs. He slides down the front steps and beats it to the corner the first chance he gets, and you may fin-ally have to resort to punishment if you are unable to impress it on his mind in any other way that he must stay at home.

The human animal has to be disciplined into staying in one place. His inclinations inherited from his antediluvian ancestors is to roam, free, over the face of the earth. Besides, we love mystery and there is always mystery around a corner. People are not traveling now by the hundreds of thousands, nay millions, because they think it is fashionable. They are traveling because they love to travel.

It is no crime to travel. If one can afford the time and the money there is no more delightful pastime and elevating influence in the world. But it is a crime to travel and make oneself obnoxious to others all along the line. The very fact that travel is heavy and that other people are taking advantage of the be washed by hand, and such things as cuffs and collar bands rarely come forth really immaculate without some old-fashioned elbow grease applied.

Indeed, and such things as cuffs and collar bands gether somewhat as the bottom and cover of a pill-box, enclose the late without some old-fashioned elbow grease applied.

Indeed, and such things are the land plants are to the land.

Whales and sharks depend for their existence indirectly on the diatoms, since a number of small diatoms, since a number of small country of their existence indirectly on the diatoms, since a number of small country of the land.

Prison Board Wakes Up

San Francisco Chronicle -We think it fair to say that the 24-year sentence fixed by the state prison board for Kid McCoy is a reflex of a stiffened public opinion on murderers and buildings of the school, while another, the manual other criminals. So, too, is the sparseness with training building, is on Church street, three blocks which the board handed out paroles at its San Quentin meeting. The public has lost patience with "reforming" murderous criminals by easy sentences and parole. STARVING ON HER \$ 300

If Henry Wadsworth Longfellow had been a resident of South California instead of Cambridge, Mass., he never would have penned the well-known lines:

> The day is cold, and dark, and dreary; It rains and the wind is never weary; The vine still clings to the mouldering wall, But at every gust the dead leaves fall, And the day is dark and dreary.

Instead he would have composed a sonnet on the beauty of winter showers, which are the harbingers of bounteous crops, green hills and valleys, and a plenteous supply of the life giving irrigation

Drawing a House By SHIRLEY RODMAN WILLIAMS

THE drawing little people do is really a language based upon the expressive instinct. They delight in making marks just as they chatter "dada." At first the marks may or may not mean anything, even to the child. Later, a picture isoften named or re-named as he sees things suggested in it. At first the pictures are perfectly satisfactory to him ,in fact, they please him greatly, and he is hurt if any one fails to appreciate them, but later, generally at about nine years of age, he begins to feel the inadequacy of his representations and is reluctant to make attempts at representing objects. After this drawing becomes mechanical imitation instead of a pleasurable means of expression unless he is encouraged to continue his efforts of self expression.
